During this week I and my team brothers worked in Prakasam Dist, Podili village it is 200 km above for us. Here we spend two days and worked among the poor and rich people. Poor people are suffering very much for their daily bread and many children living without school going to labor work with their parents. People are worshiping idols and trees, when we are distributing tracts people are strictly rejected and few women are quarrel with us why are come to our village and distributing waste papers and you are doing this work without have no any work, eating food and doing useless work and talking very bad words. We are trying to give some explain, but they are ready to beat. Here in rural villages Hindus seeing Christians very cheap.

Very hardly we had worked among these kinds of people in two days; day time distributing tracts house to house and preaching the word of God by megaphone and Night Street Gospel meeting on the road. For street meeting 30 to 43 people are attended and hear the Word of God with much interest. In fact there is a much need to work like this many villages, anybody not working here, because it is very hard and dangerous. I hear some news there, in 1991 one Pastor Work there, but having many problems anybody cannot work after very long we had now worked. I hope that God will open doors to work here again and again and like this many villages. Please kindly pray for them.
